EDUCATION

University of Patras

Integrated Masters, Electrical & Computer Engineering

Patras, Greece

Sep 2019 – Sep 2025

Academic Standing: GPA: 7.76/10

Thesis: [Fall Detection – Prediction using Deep Learning Techniques](#)

Specialized Coursework: Signal Processing (9.5/10), Machine Learning (9.0/10), AI 1 / AI 2 (8.5/10)

4th Lyceum of Patras

High School Diploma

Patras, Greece

Sep 2016 – Jul 2019

Academic Standing: Grade: 19.0/20 · Final State Exams: 17,487/20,000 · Math State Exams: 19.9/20

WORK EXPERIENCE

Brain Computer Interface Research Infrastructure UPatras 🌐

Research Assistant

Patras, Greece

Jan 2025 – May 2025

AI & Neuroengineering Research: Conducted literature reviews and authored a scientific paper focused on application of **Pretrained Foundation Models for EEG**.

Academic Program Management: Supported core laboratory educational initiatives, designing and hosting technical workshops for an intensive **5-day international summer course**.

Master's Course Design & Instruction: Prepared curriculum materials, presented lectures, and handled grading operations for a Master's-level **Human-Computer Interaction (HCI)** course focused on **Brain-Computer Interfaces (BCI)**.

Technical Training: Lead technical training, instructing laboratory researchers on the deployment, data acquisition, and calibration of devices from **Bitbrain** and **Artinis** neurotechnology equipment.

EXTRA-CURRICULAR & LEADERSHIP EXPERIENCE

Volunteering Leadership Positions

BEST & IEEE Student Branches

Patras, Greece

Sep 2023 – Sep 2025

Evolved soft & hard skills in **ECE** and **Engineering volunteering** groups ([IEEE SB](#) & [BEST LBG](#)).

IEEE VR 2024

3DUI Contest 2nd place Awardee ([Honorary Award](#))

International

Nov 2023 – Apr 2024

Collaborated in a small team to design and deploy 3D user interface features using **Unity** and **C#**; presented the final submission to an international audience.

University of Patras

Teaching Assistant – Course Final Project

Patras, Greece

Feb 2022 – Jun 2022

Mentored student cohorts on a **PID Ball Balancing System** project, leading structure's design while guiding execution across control theory application and estimation skills.

SKILLS & INTERESTS

Technical Skills: Python, TensorFlow, PyTorch, Matplotlib, SQL, C/C++, OpenGL, Java, MATLAB.

Technical Projects: Functional Connectivity Visualizer in Python, Hodgkin-Huxley Neuron Simulation in Python, Gerstner Waves Simulation in C++/OpenGL.

Languages: Greek (Native), English (C2 Michigan, IELTS Band 8).

Interests: Volunteering, Coding/Electronics Projects, Math Problem Solving, Piano.
